The image contains a course flowchart for the Architectural Engineering program. It outlines the course requirements for each semester, including prerequisites and electives. The flowchart is detailed with course codes, titles, and descriptions, along with notes on prerequisites and electives. The chart includes prerequisites, concurrent courses, and elective courses that are to be selected from approved lists. The chart also highlights that certain courses are not approved for ARE/CNS majors and that electives are to be selected from the current approved Department list. The chart is used to guide students through their course selection process, ensuring they meet all degree requirements.
